

# Sysgration and Quantum Systems Form Strategic Partnership to Advance UAS Innovation in Taiwan

Taipei, September 10, 2025 – Sysgration Co., Ltd. (TPEX: 5309), a leading provider of AI, edge computing, and unmanned vehicle solutions, has partnered with Quantum Systems, a pioneer in electric vertical take-off and landing (eVTOL) aerial intelligence solutions, to localize assembly, integration, and sustainment of advanced unmanned aerial systems (UAS) in Taiwan. The partnership strengthens technology transfer, innovation, and long-term support across the Asia-Pacific.

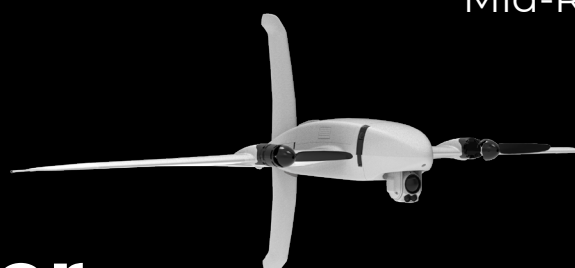

## Reliant

Long-Range VTOL UAS

## Vector AI

Mid-Range eVTOL sUAS

## Twister

Short-Range eVTOL sUAS

Under the agreement, Sysgration will handle production, integration, and lifecycle support for Quantum Systems' Twister, Vector AI, and Reliant platforms, including maintenance, training, and secure supply chain processes.

"Sysgration is proud to partner with Quantum Systems to bring sovereign, in-country UAV production and support to Taiwan," said Albert Hsing, Automotive & Mobile Division General Manager of Sysgration. "Our heritage in manufacturing and AI expertise enables us to deliver aerial solutions for diverse applications—from public safety and environmental monitoring to industrial inspection."

The collaboration supports Quantum Systems' global-local strategy, positioning Taiwan as a hub for rapid fielding, sustainment, and co-development with regional partners.

"By investing in localized integration with a trusted partner like Sysgration, we can accelerate innovation and ensure advanced UAV systems are available across the region," said Dave Sharpin, Chief Executive Officer of Quantum Systems Inc.

Sysgration will showcase Quantum Systems' UAS at Booth I0201 and Quantum Systems at Booth I1208 during the Taipei Aerospace & Defense Technology Exhibition (TADTE), September 18–20, 2025. Teams from both companies will highlight local production, training, and collaboration opportunities with industry and government stakeholders.

## About Sysgration

Sysgration Co., Ltd. (TPEX: 5309) is a Taiwan-based technology company specializing in AI, edge computing, ruggedized electronics, and unmanned systems solutions. With over four decades of expertise in precision manufacturing and integration, Sysgration delivers secure, reliable products for automotive, industrial, energy, and public safety markets. The company is committed to driving innovation, supporting sustainable ecosystems, and enabling future-ready solutions worldwide.
